

(a) Harmful coalition proposals and accepted outcomes

(b) Severity and voting support among the 30 accepted Game 1 proposals

Accepted means the proposal became the selected agreement. Literal-zero classification applies only to Game 1 because Games 2 and 3 use different protocols. Game 1 proposer pattern: 44/45 had Elo ≥ 1400 ; all 12 monoculture proposals came from Gemini 3.1 Pro; all 5 homogeneous-adversary proposals came from the adversary model.
